It gives you, the end user, more control over the export process than you'd have on the QB Desktop. For example: * You can select the account on which the export is to be done. * You can select the appropriate data to export. * You can specify the export format. * You can schedule the export process and initiate from the desktop or online environment. * You can choose the destination file, upload the file, or email the file. * You can control the quality of the exported data. You can download the latest version from the QuickBooks Customer portal and test the export process using the following links: QuickBooks Online for Mac Zed Axis supports the export of data from the QuickBooks Online for Mac application. This page contains information about the type of data you can export, the export format, and the destination file or folder. *The data types that can be exported are: Sale Receipts Sales Invoices Inventory Adjustments Inventory Expense Reports Purchase Receipts Purchase Invoices

Purchase Invoice Items Expense Reports Vendor Payments Vendor Checks What is export format The export format refers to the type of data that can be exported in a certain format. Select the format that you would like to use as an export format. You can select either the standard Excel format or the.csv format. In the Excel format, data is exported as a spreadsheet. The data is displayed in columns as defined in the QuickBooks Desktop software. In the.csv format, data is exported as a comma-delimited list. The data is displayed in rows as defined in the QuickBooks Desktop software. You can change the format at any time. What is the destination file The destination file refers to the file that the exported data will be saved to. When you export data from the QuickBooks desktop application, a destination file is created in the C:\quickbooks\desktop\drive\Libraries folder. When you export data from the QuickBooks Online for Mac application, the destination file is created in the C:\quickbooks\desktop\drive\Libraries folder. You can choose to save the data to a text file, a.csv file, or an Excel spreadsheet. What is the 82157476af
